Lyovapor™ Software
Freeze Drying with Infinite-Control™

The Lyovapor™ Software provides Infinite-Control™ for the Lyovapor™ L-200 and Lyovapor™ L-300. For the first time in Freeze Drying, Quick-Design offers a fast way of programming and starting methods. Furthermore, real-time process tracking and individual reporting are included.

Infinite-Control™
Data control from anywhere, at anytime

Easy to use
Graphic method programming

Safe
Sample protective state
Lyovapor™ Software

Key features and advantages

- **Status bar**
  - Real time process data

- **Navigation**
  - Easy to use

- **Push notification**
  - Stay informed via App

- **Status graph**
  - Real-time process schematic and diagram

- **Sample protective state**
  - Set safety temperature and pressure range

- **Graphic method editor**
  - Method programing in a graph or table format

- **Report**
  - Can be individually set up
Characteristics:

Quick-Design
The graphical programming of methods leads a fast process start.

Status graph
All the data can be shown real-time in an animated process schematic and on a graph diagram, it helps to identify events.

Sample protective state
The sample protective state reduces the pressure and stops shelf heating, if the sample temperature rises above the set collapse temperature or the pressure is outside the safety pressure range.

Method database
All methods can be stored in an independent database and will be available for further runs and can be changed on any computer on your network.

Method start
All methods can be started and changed while running from your desk or on the Interface Pro.

Customized reporting
The software tracks all the sensor parameters and individual report can be created with all necessary data.

Infinite-Control™
Have access to all devices and process parameters. You get informed by push notifications anywhere anytime. Advanced options:
- Easy handling and operation of methods
- Data recording and customized reporting
- Real-time process schematics and diagrams
Lyovapor™ Software: Your most important benefits

**Infinite-Control™**
- Track runs due to real-time data recording
- Remote monitoring on your mobile devices
- Track several BUCHI instruments at the same time

**Easy to use**
- Quick-Design as a fast way to program and start methods
- Intuitive to use software
- Methods can be easily adjusted while running

**Safe**
- Sample protective mode prevents collapse temperature and pressure rise
- Real-time tracking with process graphs and schematics
- Stay informed via push messages

**Complete your portfolio**

- **Lyovapor™ L-300**
  The first lab Freeze Dryer for continuous sublimation

- **Lyovapor™ L-200**
  The first Freeze Dryer with Infinite-Control™

- **Rotavapor® R-300**
  Convenient and efficient rotary evaporation

- **Mini Spray Dryer B-290**
  World leading laboratory Spray Dryer
